REPORT FOR COMMITTEE CONSIDERATION

TO: Chair and Members, Climate Action Mitigation and Adaptation
Standing Committee

File No.: CLI 1.0

FROM: Rachael Ryder, Corporate Sustainability Specialist

DATE: July 26, 2024

SUBJECT LGCAP Survey and Reporting Requirements 2024

SUMMARY: Purpose: For Information

Attachments:

1. Backgrounder

2. LGCAP Year 2 Survey

Previous Reports: Item No. 5.1, July 2023

RECOMMENDATION(S):

THAT the report dated July 26, 2024 regarding "LGCAP Survey and Reporting Requirements 2024" be received for information.

ENTITLEMENT	HOW VOTE COUNTED
All 1 Director/1 vote	Majority

ISSUE(S):

In 2007, the Regional District committed to addressing climate change issues by signing onto the British Columbia Climate Action Charter. It is a voluntary agreement between the provincial government, Union of British Columbia Municipalities, and each local government signatory to take action on climate change. As Charter signatories, local governments commit to carbon neutral corporate operations, measuring and reporting out on greenhouse gas emissions and creating more energy efficient communities.

Through the Local Government Climate Action Program (LGCAP), the provincial government provides grants to local governments that are signatories of the Climate Action Charter. The conditional grant program funds are available to plan and implement climate action that will reduce emissions, create new opportunities for people in the clean economy and prepare communities for future climate impacts.

The attached LGCAP Survey fulfils the reporting requirements of the LGCAP program for the second year of the program. The survey includes the reporting of corporate emissions and will be posted to the Regional District website with the signed attestation.

The Committee is not being asked to take any action at this time.

RELEVANT POLICIES:

- British Columbia Climate Action Charter:
 - signatories committed to being carbon neutral in respect of operations;
 - measuring and reporting on their greenhouse gas emission profile; and
 - creating complete, compact, more energy efficient rural and urban communities
- Climate Change Accountability Act:*
 - establishes Province wide targets to reduce greenhouse gas emissions

3. CleanBC Strategy:

- developed to support the *Climate Change Accountability Act*

STRATEGIC ALIGNMENT:

- ☒ Climate Action ☐ Economic Health ☐ Indigenous Relations ☐ Strong Communities
- ☐ None – Statutory or Routine Business

SERVICE RELEVANCE:

The Strategic Priorities set by the Regional District Board for the period 2019 – 2023 include Climate Action as one of the four priorities.

FINANCIAL CONSIDERATION(S):

LGCAP is a provincial program that provides local governments with funding to support the implementation of local climate action that reduces emissions and prepares communities for the impacts of a changing climate. The Regional District received annual funding in 2022 and 2023. March 2024, the provincial government allocated the equivalent of three years of program funding to the Regional District in the amount of \$307,897. The Regional District is required to continue with the annual survey reporting over the next three years and commit to spending the funds by March 31, 2028.

OTHER CONSIDERATION(S):

N/A

DECISION OPTIONS:

1. Approve recommendation.
 - that the report be received

COMMENTS:

Sustainable Practices Administration is committed to working with relevant service areas to develop strategies that address climate change adaptation and mitigation. Grant funding from LGCAP has allowed for projects such as updating the 2009 Corporate Climate Change Action Plan, continuation of energy efficient retrofits in Regional District facilities, developing a current corporate climate inventory to determine energy consumption as well as reviewing the vulnerability of Regional District facilities to climate change and developing long term climate adaptation plans.

Respectfully submitted,

“Rachael Ryder”

Rachael Ryder
Corporate Sustainability Specialist

RR

REGIONAL DISTRICT of Fraser-Fort George

BACKGROUNDER

LGCAP Survey and Reporting 2024

The Local Government Climate Action Program (LGCAP) provides conditional grant funding to local governments and Modern Treaty Nations. This funding supports local climate action that reduces greenhouse gas (GHG) emissions and prepares communities for the impacts of a changing climate.

As a condition of the grant funding, local governments must complete the annual LGCAP Survey. The survey includes:

- Mandatory measurement and reporting of corporate GHG emissions for 2023
- Reporting on projects linked to one or more objectives from the CleanBC Roadmap 2030 or the Climate Preparedness & Adaptation Strategy
- Demonstrating climate investment equivalent to 20% of the provincial funding received

The General Manager of Financial Services is required to submit and publicly post:

- A completed and signed attestation form to confirm all funds, were, or will be, used towards climate action
- A completed PDF version of the required program survey

Measure and report traditional services GHG emissions

A traditional services emissions inventory is an assessment of corporate GHG emissions that occur within a defined boundary and within a defined period (for a given year). Reporting on GHG emissions associated with the delivery of traditional services for the Regional District includes:

- Administration and Governance
- Fire protection
- Recreational and cultural services
- Solid waste transportation
- Street lighting
- Water and wastewater management

Reporting on traditional services GHG emissions also applies to emissions from contracted services. This includes contracts that are:

- New or renewals after June 1, 2012
- Over \$25,000 in value in any calendar year
- In scope (does not include landfill operations nor transportation of recyclables)

For contracted services, local government track and report on emissions from mobile sources derived from fossil fuel consumption used to operate vehicles, equipment and machinery – not for contractor buildings.

Emissions are reported in tonnes of Carbon Dioxide equivalent (tCO₂e)

tCO ₂ e	2022	2022 Amended	2023
Corporate Emissions	628	890	862
Contractor Emissions	427	441	530
Total Emissions	1,054	1,331	1,392

In the LGCAP reporting submitted for 2022, it was calculated that the Regional District had created 1,054 tCO₂e in the delivery of corporate and select contracted services. Through the work completed by Community Energy Association on the Corporate Climate Change Action Plan update it was determined that emissions from The Exploration Place had been omitted from the 2022 reporting. The amended total for 2022 is 1,331 tCO₂e.

Emissions by Source (tCO ₂ e)	2022	2023
Electricity	38	35
Natural Gas	480	448
Gasoline	82	108
Diesel	599	663
Heating Oil	2	2
Propane	130	136
Total	1,331	1,392

There was a 4.6% increase in emissions from 2022 to 2023. This is attributed to an increase in vehicle fuel consumption for both corporate and contractor services in 2023.

At the end of 2023 and into 2024 a number of energy efficiency upgrades were implemented at multiple volunteer fire departments. It is anticipated that a reduction in GHG emissions from these upgrades will be realized in 2024.

Grant funding and Regional District climate action

The Regional District received LGCAP grant funding instalments of \$105,082 in 2022 and 2023. In 2024, LGCAP provided a lump sum instalment of \$307,897 which includes funding for the next three years.

In 2022 and 2023 grant funding covered a portion of the staffing costs for the Corporate Sustainability Specialist position. Expenditures for the Corporate Climate Change Action Plan update in 2023 and 2024 were also covered by LGCAP grant funding.

Consideration for how the remaining LGCAP grant funds will be spent over the next three years will be influenced by the action items contained in the Corporate Climate Change Action Plan update.

Confirmation number: 01D43ADB

Submitted date: 2024-07-30 14:54:54 Pacific Daylight Time

LGCAP 2024

Introduction

Reaching [net-zero emissions](#) and adapting to a changing climate will require a whole-of-society approach. The Local Government Climate Action Program (the Program or LGCAP) aims to catalyze the efficient flow of financial resources, data and knowledge between Modern Treaty Nations, local governments, and the Provincial Government to allow for cost effective, impactful, locally implemented climate action. For more information about the Program you can refer to the [website](#).

What is climate action?

For the purposes of this program, a climate initiative or action is one that reduces greenhouse gas (GHG) emissions (mitigation) and/or strengthens resilience to the impacts of climate change (adaptation). This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

Information collected will:

- Highlight local government and Indigenous climate leadership;
- Profile action by including local government and Modern Treaty Nation emissions, resilience and climate action performance data in the annual [Climate Change Accountability Report](#);
- Help inform policy development and monitor progress on achieving provincial and local climate objectives; and
- Support provincial efforts to better collaborate with and support communities to advance climate action.

The survey was informed by:

- Feedback from local governments, Modern Treaty Nations and ministerial partners;
- National and international GHG reporting protocols; and
- The CDP (formerly [Carbon Disclosure Project](#), a global non-financial disclosure system).

Instructions

**Please do not provide any personal information (e.g. email, phone number) in the survey.*

Survey: Word Version

A survey template (i.e. a Word version) is available on the [Local Government Climate Action Program webpage](#). The template can be used to gather information from staff across departments. Then simply cut and paste into the online version where you'll be submitting the survey.

Survey: Online Version

SimpleSurvey allows multiple users to access your survey, though two people **cannot** enter information at the same time.

- For other users to contribute to your survey, simply share the unique link with your team members.
- Users must select "Save and continue later" when they are done updating the survey but not ready to submit.

Required fields are indicated with a red asterisk (*). You will not be able to submit the survey and attestation form without completing these fields.

- Some fields have formatting considerations (i.e. numbers only). You will not be able to submit the survey and attestation form until all required fields are completed properly. The red text error message will indicate what is needed.

There is a 9,999 character limit for the open-ended questions.

Attestation Form

The attestation form is filled in after survey questions are completed. It is the second page of the SimpleSurvey submission.

- The attestation form is where the Chief Financial Officer, or equivalent position, attests to the following:
 - That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
 - That Local Government Climate Action Program funds for years 1 and 2 received in 2022 and 2023 will be spent by March 31, 2025.
 - That Local Government Climate Action Program funds for years 3-5 received in 2024 will be spent by March 31, 2028.
 - That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2024.

Requirements

1. Reporting

1. Report on **at least one** project linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#). If your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. Funding for the project(s) does **not** need to come from this program.
 2. For communities with populations of 10,000+ (based on 2020 BC Census data figures), measuring and reporting local government's traditional services emissions is required.
 3. Attest that funds will be allocated to climate initiatives before submitting your survey.
- Open-ended questions asking for one or more initiatives related to climate action may be highlighted in Provincial materials to acknowledge innovative local climate solutions. A template to submit climate action success stories for publication can be found on the [Local Government Climate Action Program webpage](#).

2. Deadline to submit the survey & attestation form

- The deadline for submitting your survey and attestation form is 4 PM PDT on July 31, 2024.

3. Posting the survey & attestation form publicly

- The design / format of the form **can** be changed, however, all information from required questions must be included.
- Optional questions and answers can be omitted.
- The deadline to post the survey and attestation form publicly is September 30, 2024.

Download a copy for your records!

Once submitted, you can **download a copy of the completed survey** and attestation form (PDF, Excel, and Word options). If you close this window before the download link appears, please reach out for a copy of your submission.

Support

If the survey is accidentally submitted, a submitted survey needs to be revised, or if you have any questions, please reach out to us at LGCAP@gov.bc.ca. We will be happy to provide assistance.

Thank you!

The LGCAP Team

The Survey

Climate Action Planning

Climate Action Plans are strategic roadmaps that identify how an organization will reduce their greenhouse gas (GHG) emissions (mitigation), increase their resilience to the impacts of climate change (adaptation), or a combination of both.

To answer the following questions, consider staff that contribute to activities that reduce greenhouse gas (GHG) emissions and/or strengthen resilience and the ability to adapt to climate-induced impacts. This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

Question 1 a): How many staff in full time equivalents (FTEs) are dedicated to working specifically on climate action?

If a staff member is a climate action coordinator and works 100% on climate-related issues, add 1.0.

0.5

Question 1 b): How many staff in full time equivalents (FTEs) are dedicated to working on climate action in other departments such as transportation or engineering?

For example: Can include staff in engineering, emergency management, transportation, waste management, etc. related to climate work but whose primary role is not working on climate action. If a staff member works approximately 25% (please estimate) on climate-related issues, add 0.25. Working on climate-related issues does not need to be written into the staff member's job description to be counted here.

0

Question 2 a): Does your local government or Nation have a community-wide climate action plan or other guiding document(s)?

No

If not, please select one or more options from the list.

No, we are not intending to undertake one due to lack of expertise or technical capacity.

Question 2 b): Does your local government or Nation have a corporate climate action plan or other guiding document(s)?

Yes

Please select the type of plan(s) from the list.

In the textbox, indicate the date the plan was adopted/approved in format YYYY-MM. If you don't remember the month, you can enter "01" for January.

Integrated climate plan (addressing mitigation and energy)
2009-12

Please include a link to the document or webpage if available.

<https://www.rdffg.ca/corporate/reports-and-publications/corporate-climate-action-plan>

Question 3: Has your local government or Nation declared a climate emergency?

No

Question 4: Please select up to 3 challenges impeding the advancement of climate action in your community.

Lack of jurisdiction.

Lack of staff capacity or expertise.

Lack of financial resources.

Optional: Is local political support a challenge your local government faces that is impeding climate action?

No

Traditional Services Greenhouse Gas Emissions

Measuring traditional services emissions (defined in previous years as corporate emissions) is a Program requirement for all communities with a 2020 population of 10,000 and above ([see population statistics here](#)). Traditional services GHG emissions are those produced by the delivery of local government or Modern Treaty Nation "traditional services" including:

- Fire protection,
- Solid waste management,

- Recreational / cultural services,
- Road and traffic operations,
- Water and wastewater management, and
- Local government administration.

Please see the following resources for guidance:

- [LGCAP Traditional Services Boundaries and Scope Guidance](#),
- [Scope Summary Document](#),
- [Traditional Services Inventory Reporting Tool](#),
- [Contracted Services Emissions Guidance](#),
- [Contracted Emissions Calculator](#),
- [BC Best Practices Methodology for Quantifying GHG Emissions](#), and
- [Emission Factors Catalogue](#).

Question 5: For the 2023 calendar year, has your local government or Nation measured and reported associated traditional services GHG emissions?

Yes

If your local government or Nation measured 2023 traditional services GHG emissions, please report the GHG emissions from services delivered directly by your local government (in tonnes of carbon dioxide equivalent) from scope 1 and 2 sources.

862

If your local government or Nation measured 2023 traditional services GHG emissions, please report the GHG emissions from contracted services (in tonnes of carbon dioxide equivalent) from scope 1 and scope 2 sources.

530

If your local government or Nation measured 2023 traditional services GHG emissions, please report the total GHG emissions from both directly delivered and contracted services (in tonnes of carbon dioxide equivalent) from scope 1 and scope 2 sources.

This would be the sum of the two questions above.

1392

If your local government or Nation measured 2023 traditional services GHG emissions, please report what protocol you used to measure emissions.

LGCAP corporate emissions inventory reporting tool. Fuel consumption from utility billing and service-based estimates for contracted services

Please provide the link to the public report if available.

Optional

n/a

Optional: Please provide any further comments you wish to share on traditional services emissions measurement and reporting here (e.g. system or approach used to measure traditional services emissions).

n/a

Community-Wide Greenhouse Gas Emissions

B.C. [Climate Action Charter](#) signatories have committed to measuring and reporting their community-wide GHG emissions generated from all GHG sources (anthropogenic) within their community boundary.

The [Community Energy and Emissions Inventory](#) (CEEI) initiative provides a provincial framework for tracking and reporting energy and GHG emissions at a community-wide scale. It is published with a two-year lag, however, raw data can be requested by local governments that wish to measure and report their community-wide emissions for the buildings and solid waste sectors ahead of publication.

The Climate Action Secretariat (CAS) is aware that some local governments are developing their own community-wide GHG emissions inventories (separate from the provincial CEEI) . A better understanding of community-wide emissions measurement across B.C. will help CAS as we upgrade CEEI.

Question 6: For the 2023 calendar year, have community-wide GHG emissions been measured for your local government or Nation?

No

If not, please select all that apply from the list.

No, community GHG emissions were not reported because the 2023 Provincial Community Energy and Emissions Inventory data has not been released.

If not, has your community or Nation measured and reported community-wide emissions in the past?

No

Question 7: Currently, the Province's legislated GHG emission reduction targets are 40% by 2030, 60% by 2040 and 80% by 2050, relative to 2007. Please state your local government or Nation's target(s).

Please enter "0" if no targets or baseline are established for the years given in the table.

2030

Reduction Percentage (format: e.g., 40)

0

Baseline Year (format: e.g., 2007)

0

2040

Reduction Percentage (format: e.g., 40)

0

0

2050

Reduction Percentage (format: e.g., 40)

0

Baseline Year (format: e.g., 2007)

0

If your local government or Nation's targets don't conform to the target years noted above, please enter them here. Format e.g.: target 2035 50% baseline 2010, target 2060 70% baseline 2010, ...

New targets to be established in an updated corporate climate change action plan to be adopted in 2024

Question 8: Does your local government or Nation have net-zero or carbon-neutral emissions target(s)?

Please select all that apply.

No

Question 9: Please select up to three supporting indicators that would be most valuable to your local government or Nation to advance climate action (these indicators were previously reported through the Community Energy and Emissions Inventory initiative).

Housing type: Private dwellings by structural type

Residential density: Population and dwelling units per "net" land area

Greenspace: Land area that is parks and protected greenspace

Optional: Please provide any further comments you wish to share on community-wide emissions measurement and reporting here.

n/a

Provincial Policy Alignment - Mitigation

The CleanBC Roadmap to 2030 is B.C.'s plan to meet provincial emissions reduction targets to be

40% below 2007 levels for 2030 and set us on course to reach net-zero emissions by 2050.

One requirement of this Program is that you must **report on a minimum of one project** linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#) (CPAS). Funding does **not** need to come from this program. For questions 10-13, if your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. That said, please select all that apply.

Question 10: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to the buildings sector. This should not be limited to what your LGCAP funding supported.

Corporate

Corporate buildings policies, programs and actions.

BC Energy Step Code adoption (Step 3 or higher).
Efficiency upgrades/retrofits.

Please enter the step for part 3 buildings (Energy Step Code).
Optional

n/a

Please enter the step for part 9 buildings (Energy Step Code).
Optional

n/a

Please highlight a community project(s) that was in-progress, ongoing or completed in the 2023 calendar year related to buildings. Please enter NA if your community reported no buildings initiatives ongoing, completed or in-progress for 2023.

N/A

Question 11: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to the transportation sector. This should not be limited to what your LGCAP funding supported.

Corporate

Corporate transportation policies, programs and actions.

Electric vehicle charging infrastructure investments.

Please highlight a community project(s) that was in-progress or completed in the 2023 calendar year related to transportation. Please enter NA if your community reported no transportation initiatives ongoing, completed or in-progress for 2023.

Installation of EV charging station in Prince George

Question 12: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to community-wide and corporate action. This should not be limited to what your LGCAP funding supported.

Corporate
Community

Corporate climate policies, programs and actions

Official Community Plans

Please highlight a community project(s) that was in-progress, ongoing or completed in the 2023 calendar year related to community-wide or corporate action. Please enter NA if your community reported no community-wide or corporate initiatives ongoing, completed or in-progress for 2023.

on going yard waste composting to produce NorGrow compost

Provincial Policy Alignment - Resilience and Adaptation

The goal of climate adaptation is to reduce risk and vulnerability associated with climate change impacts. To manage climate impacts, local governments and Nations are integrating climate adaptation principles into decisions and everyday activities.

One requirement of this Program is that you must report on **at least one or more** project(s) linked to one or more objectives from the [CleanBC Roadmap to 2030](#) and/or the [Climate Preparedness and Adaptation Strategy](#) (CPAS) in Questions 10-13. If your community reports one initiative related to one sector you have satisfied this requirement, but please select all that apply for Questions 10-13.

Question 13: Please indicate all initiatives your local government or Nation had completed, ongoing or in-progress in the 2023 calendar year to adapt to and build resilience to climate impacts. This should not be limited to what your LGCAP funding supported.

Corporate

Corporate resilience and adaptation policies, programs and actions.

Monitoring climate risks or impacts (floods, wildfire, etc.).

Please highlight one or more climate adaptation project(s) that were completed, ongoing or in-progress in the 2023 calendar year to reduce risk and increase resilience. Please enter NA if your community reported no community-wide or corporate initiatives ongoing, completed or in-progress for 2023.

Please note that highlights for resilience actions may be shared with the Ministry of Emergency Management and Climate Readiness (EMCR) for them to use on ClimateReadyBC as part of their work on sharing info on climate resilience in BC. EMCR may follow up for more details if needed.

in progress climate risk and vulnerability assessment

Question 14 a): Has a climate risk and vulnerability or similar assessment been undertaken for your local government or Nation?

Please select all that apply. In the textbox, please provide the link to the public assessment if available.

No

If not, please select one or more options from the list.

No, but we are currently undertaking one and it will be complete in the next two years.

Question 14 b): Are you integrating climate risk into asset management, budgeting and climate action plans?

No

Question 15: What are the most significant climate hazards and impacts faced by your jurisdiction and what is the timeframe of their expected impact on your community?

For each selection, please indicate if the timeframe of their expected impact is short, medium, long or not sure. (short [current/by 2025]; medium [2026-2050]; long [beyond 2050])

Extreme heat and heat stress

not sure

Extreme cold, snow and ice

not sure

Wildfire

short

Overland flooding

short

Question 16: What information do you need to know to be able to plan effectively for the future of your community, with respect to the hazards and impacts identified in Question 15? Please select one or more of what you consider the most valuable types of information for planning.

Localized climate modelling and projected scenarios

Risk assessment of hazards

Examples of actions taken by other communities

Optional: What resilience indicators are of most value to your local government or Nation?

n/a

Question 17: Based on the hazards and impacts you indicated as most significant in Question 15, which groups are most vulnerable to the impacts of those climate hazards and impacts?

Low-income households
Indigenous Peoples
Newcomers to Canada (immigrants and refugees)
People experiencing homelessness
Seniors
Persons with disabilities

Question 18: Of the hazards and impacts identified in Question 15, please specify the associated adaptation measures completed or in-progress in the 2023 calendar year, if any. If entering a hazard under "Other", please also write the hazard in the "Adaption measure" textbox.

Wildfire
Adaptation measure
Firesmart

Equity

Taking an equity-informed approach to climate action is about enhancing climate resilience for everyone in B.C., regardless of where and how they live and requires a just approach that integrates equity considerations into climate planning and adaptation responses.

Question 19: How does your local government or Nation ensure equitable access to and distribution of climate action opportunities and benefits?

Please select all that apply.

There are no specific measures in place to ensure equitable access to and distribution of opportunities and benefits.

Optional: Please highlight a climate initiative completed or in-progress in the 2023 calendar year that promotes equity and inclusion.

n/a

LGCAP Year 2 Funding

The Program must be able to demonstrate the impact this funding has on greenhouse gas emissions reductions and resilience and adaptation in B.C. To substantiate the Program, we must develop a baseline understanding of where local governments and Nations are at with respect to climate action and track progress over time.

Please do your best to specify how much of your LGCAP funds was invested for each initiative undertaken without double counting.

Question 20: What did/will your local government or Nation spend its LGCAP funding on for year two of the Program (2023)? Please select all that apply and indicate the total dollar value associated with each initiative. For LGCAP 2023 funding, Regional District of Fraser-Fort George received 105082. Please ensure the amount(s) entered for Question 20 equal this amount in total.

Corporate
Funds on hold
26760.50

Climate study
11115.00

Funds on hold - How will funds be allocated?

Please indicate the project(s) funds have been allocated to.
Completion of Corporate Climate Change Action Plan

Please highlight the initiative(s) your local government or Nation's LGCAP year two funding will support.

staffing and development of corporate climate change action plan including climate vulnerability and risk assessment

Question 21 a): How much additional funding for climate action were you able to invest by leveraging your LGCAP funds? This could include matching grants as well as private investment.

Format: no dollar sign and up to two decimal places

0

Question 21 b): Please list the funding programs leveraged and associated funders (i.e. Investing in Canada Infrastructure Program, Canada/Province).

Please enter "NA" if no funds were leveraged.

NA

Question 22: What is your internal decision criteria for spending LGCAP dollars?

that it results in a reduction in GHG emissions or provides information for future climate adaptation

Question 23: Does your local government or Nation use a formal framework to apply a climate lens on infrastructure planning and decision-making?

This could include the Provincial preliminary GHG assessment guidance, the Federal climate lens guidance, or another climate lens framework.

No

Question 24: What is the value in the Program's continuity for your community?

Optional

overall reduction in GHG emissions and being prepared for future climate change impacts

Please note on posting the survey publicly:

- All information from required questions must be included.
- Optional questions and responses can be omitted.
 - The Province will use the information for internal purposes only.
- When posting the survey publicly, the design / format of the form can be changed.

Local Government Climate Action Program Attestation Form

Instructions for the Attestor (CFO or equivalent staff person):

Complete and sign this form by filling in the fields below.

I, the Chief Financial Officer, or equivalent position, attest to the following:

1. That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
2. That Local Government Climate Action Program funds for years 1 and 2 received in 2022 and 2023 will be spent by March 31, 2025.
3. That Local Government Climate Action Program funds for years 3-5 received in 2024 will be spent by March 31, 2028.
4. That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2024.
